## Data Tracking

Set up scanners at checkpoints and capture RFID, barcode, or QR code data. Event modes and flexible settings let you collect the data you need across your entire organization.

Access Control

Manage physical access permissions within your database or upload from an existing security system. Control admission by badgeholder and match individuals to photo IDs.

Analytics

Create personalized reports with advanced filtering and reporting options. Save reports you use frequently and receive them on a daily, weekly, or monthly basis.

FEATURES

Location Tracking
Log location data by checkpoint

Emergency Mustering
Quick headcount in an emergency

Time Clock Calculator
Automatic digital timesheets

Kiosk Mode
Unmanned check-in stations

Photo IDs
Check photos for admission in real-time

Custom Prompts
Create pop-ups to collect user input

Data Security

Data Center Location: Texas, USA

Adheres to information and security certifications and standards, including: SSAE18 SOC1, SOC2, and SOC3; PCI DSS; ISO 27001; ISO 14001; and ISO 9001.
